RE: Support for grant applications NOVA 22-2082 Cle Elum RD Alpine Lakes Wilderness E&E 2024-2025 and NOVA 22-2133 Cle Elum RD Non Motorized Trail M&O 2024-2025

Dear evaluation committee members,

The Mountaineers enthusiastically endorses the Cle Elum Ranger District's RCO grant proposals to fund wilderness rangers and trail maintenance.

The Mountaineers, based in Seattle, Washington and founded in 1906, is a nonprofit outdoor education, conservation, and recreation organization whose mission is "to enrich the community by helping people explore, conserve, learn about and enjoy the lands and waters of the Pacific Northwest and beyond." 1,200 skilled volunteers lead 3,200 outdoor education trips and courses annually for 16,000 members. Our youth programs provide over 10,000 opportunities each year for children to get outside. We are a passionate, engaged, and knowledgeable community that cares about the outdoors, and protects the outdoor experience for current and future generations.

The Cle Elum Ranger District of the Okanogan-Wenatchee National Forest is one of the most popular destinations for hiking, backpacking, cross-country skiing and other wilderness activities in the Pacific Northwest. Every year, Mountaineers members frequent the District for hiking, climbing and scrambling outings, and outdoor recreation skill instruction.

At The Mountaineers, we experience increased interest in our courses and activities every year, as our region experiences continued population growth. Unfortunately, the very crowds that are drawn to the beauty and challenge of the District's unique terrain threaten to destroy the Wilderness experience they are seeking. Our members observe that recreation in the Alpine Lakes Wilderness has been drastically increasing these past few years. Popular Okanogan-Wenatchee National Forest destinations such as Rampart Ridge, Rachel Lake, Spectacle Lake, Tuck and Robin Lakes, Jade and Marmot Lakes, and the Pacific Crest Trail are increasingly the sites of wildlife conflicts, safety incidents, and major impacts to the vegetation, soil and water quality. In order to preserve the integrity of the land as well as the experience of hikers, backpackers and other recreational users, we strongly support the District's RCO grant applications.

The Cle Elum District's education and enforcement proposal follows a proven model to prevent and remediate backcountry impacts and improve safety in popular destinations. The dedicated wilderness rangers will be able to provide direct education to wilderness users on Leave No Trace and other best

practices for low-impact backcountry use. These rangers play an integral role in identifying key problem areas so they can harness volunteer power to steward the most fragile and affected recreation sites. The Cle Elum District's wilderness education program will provide measurable results for improving the natural features of the landscape as well as the experience of those who recreate in the District. These educational efforts are also critical in addressing increasing tribal concerns with recreation impacts on their sovereign and inherent rights, including treaty rights.

We also strongly support the Cle Elum Ranger District's grant application for non-motorized trail maintenance. It is critically important to regularly maintain trails to withstand the increased recreational use and protect fragile ecosystems. As you know, federal funding for the U.S. Forest Service has decreased over time and is no longer able to support dedicated trail maintenance crews. This grant funding is essential for the Cle Elum District to continue to maintain beloved and well-used trails. Without this support, trails that Mountaineers and other recreationists use could fall into disrepair.

Thank you for considering these important proposals, and thank you for your work on behalf of Washington's natural landscapes and recreating public.

Sincerely,

Betsy Robblee
