

Trail or Site:

Surveyed By:

When in Wilderness Area, record location and other details for all non-native plants. Include plant name in survey notes.

If a weed is a priority in the area being surveyed, record details including location on survey form.

For weeds not a priority in the area being surveyed, just mark them present but don't need lat/long location unless in Wilderness Area.

You can pull and bag weeds if you are very confident of the ID and it is a weed that can be controlled effectively by pulling. Otherwise just note its location.

1 - Regulated noxious weeds in King County, call 206-296-0290 or email noxious.weeds@kingcounty.gov if found in King County

2 - Regulated noxious weed in Kittitas County, call 509-962-7007 or email weeds@co.kittitas.wa.us if found in Kittitas County
