Flowering plant identification 101

PLANT EVOLUTION TIMELINE

Geologic Time			HOH-VASCULAR		VASCULAR				
Era	Period	Years Ago (MYA)	Aquatic	Land	Ho Seeds Ferns	Gymnosperms			Angiosperms
			Algae			Ginkgos	Conifers	Cycads	Flowering Plants
Cenozoic	Quaternary	1.8							
	Tertiary	65	W			Na Na	8	A STATE OF THE PARTY OF THE PAR	
Mesozoic	Cretaceous	145							
	Jurassic	213							
	Triassic	248							
	Permian	286						•	
	Carboniferous	360							
Paleozoic	Devonian	410							
Palec	Silurian	440							
	Ordovician	504							
	Cambrian	544							

Example of plant taxonomy

Common flowering plants in spring northwest woods – Trillium ovatum

Trout lily

Starry false solomon seal

Racemose false solomon seal

Pacific waterleaf

salmonberry

Thimbleberry

Trailing blackberry

Bitter cherry

Ocean spray

Osoberry – Indian Plum

Siberian miner's lettuce

Bleeding heart

Corydalis

Stream violet – wood violet

Sweet coltsfoot

Evergreen huckleberry

Red huckleberry

Dull oregon grape

salal

Skunk cabbage

Red flowering current

Piggy back plant (youth on age)

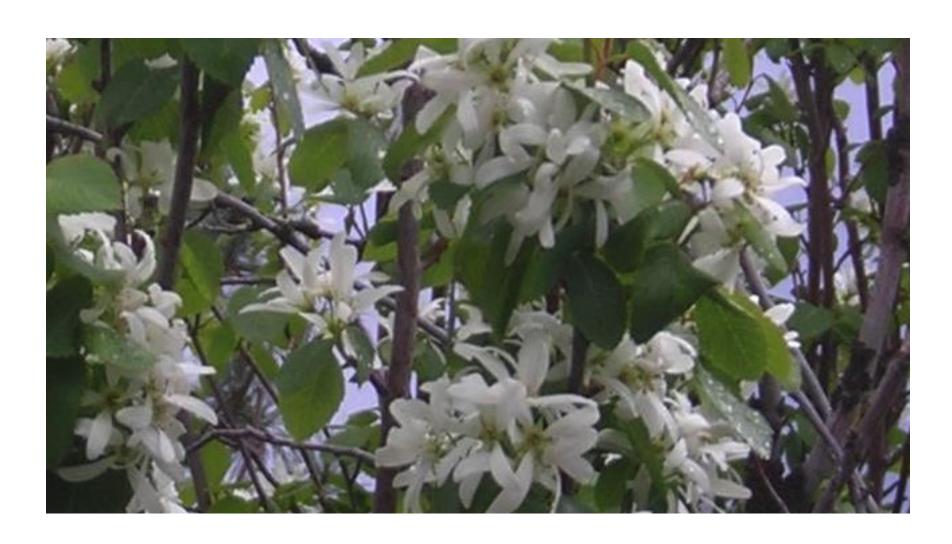

fringecup

Foamflower

Serviceberry (saskatoon)

Bigleaf maple

Red alder
